Aman

React Developer

Experienced React Native developer with 6+ years in mobile application development, specializing in cross-platform solutions and enterprise integrations. Strong proficiency in JavaScript/TypeScript with hands-on experience in React Native for frontend development. Skilled in Node.js, Express.js, and Salesforce integrations on the backend, with expertise in RESTful API development and secure authentication protocols. Proven track record in financial services applications, workflow automation, and CI/CD implementation.

Professional Experience

- Developed responsive web applications using React.js and Redux for optimal performance.
- Built scalable and maintainable server-side applications using Node.js and Express.js.
- Created and integrated RESTful APIs for seamless data transmission between servers and clients.
- Implemented CI/CD pipelines to automate testing and deployment processes.
- Collaborated with cross-functional teams to design and implement software solutions.
- Leveraged AWS services for infrastructure management and application deployment.
- Optimized application performance through troubleshooting and debugging techniques.
- Participated in code reviews to ensure code quality and adherence to best practices.

Technology Summary

Technical Skills

- Frontend: React.js, Redux, JavaScript, HTML, CSS
- Backend: Node.js, Express.js
- Databases: MongoDB, MySQL
- Cloud: AWS
- Tools: Git, Postman, Visual Studio Code

Employment History

Full-stack Developer

AveryBit Solutions Pvt. Ltd., Indore
Apr 2023 - Current

- **Mobile Application Development**: Designed and developed cross-platform mobile applications using React Native, focusing on user-centric workflows and responsive UI components
- **API Integration & Security**: Created and integrated RESTful APIs with secure authentication using OAuth protocols, ensuring seamless data transmission between mobile clients and backend services
- **Performance Optimization**: Implemented performance tuning strategies for mobile applications, including debugging techniques and code optimization for enhanced user experience
- **CI/CD Implementation**: Established automated CI/CD pipelines for mobile deployment across Android and iOS platforms, reducing deployment time by 40%

- **Team Collaboration**: Collaborated with cross-functional teams including business analysts, QA engineers, and backend developers in Agile development environment
- **Cloud Infrastructure**: Leveraged AWS services for scalable infrastructure management and application deployment

Software Developer

AveryBit Solutions Pvt. Ltd., Indore
Apr 2019 - Apr 2023

- **Frontend Development**: Developed responsive web and mobile applications using React.js and React Native with Redux for state management
- **Code Quality Assurance**: Participated in comprehensive code reviews to ensure adherence to best practices and maintainability standards
- **Problem Resolution**: Collaborated with development teams to troubleshoot and debug complex application issues, improving system reliability
- **API Development**: Gained extensive experience in RESTful API development and third-party service integrations

Work Experience

Project: HRMS
Client: NDA
Duration: Aug 2022 – Jan 2024
Role: Frontend Developer

Technologies: React
Key Features: Employee data management, time-off requests, and performance reviews.

Description:
HRMS stands for Human Resource Management System. It is a software application designed to manage various aspects of an organization's workforce, including employee data, time-off requests, performance reviews, and benefits administration.Let me know if you want this simplified or turned into a short definition or slide content.

Project: Mindshine
Client: NDA
Duration: Apl 2020 – June 2022
Role: Full-stack Developer
URL: https://www.mindshine.app/

Technologies: React, Node.js
Key Features: Daily routines, progress tracking, and trigger analysis.

Description:
Wellness app for improving habits and tracking progress

Project: Greator Events
Client: NDA
Duration: Dec 2023 - Inprogress
Role: Full-stack Developer

Technologies: React, MongoDB, Node.js
Key Features: Speaker details, ticket management, and push notifications.

Description:
This app is designed for the events of Greators. It showcases various events organized by Greators, each featuring different speakers. Users can view detailed information about each speaker, including their scheduled speaking time and the stage they will be on.

Every event has its own ticket system. Users can view and upload their tickets based on the event they are attending. Additionally, users can add speakers to their favorites for quick access.

The app also includes a social feed where users can post updates, and all users can see each other's posts. Push notifications are sent to users based on the events they are interested in, ensuring they stay updated in real time.

Education

Master in Computer Application
Apr 2021 - Apr 2023
